

RANGE RULES

No person shall handle a firearm in any manner while target setters are down range (this includes cleaning, sight adjustments, etc).

During target setting all firearms should be left facing down range, unloaded and actions open (magazine out). Shooters or spectators should stand clear of firing line while anyone is down range.

No person shall proceed down range for any reason without checking to ensure that the firing line is safe and clear.

Targets should be hung in the center of the chip board, NOT over the legs or rails of the frame.

Intentional damage to range structures, equipment, signs and target frames is forbidden.

Use of proper targets only (NO bottles, cans, etc).

On Ranges where Barrel Limiters exist on the shooting benches your firearm's barrel must be kept below it.

NOTE: Any person found to be willfully damaging Range property will face restrictive action by the Range Management.
